Star wars dice explained

The Star Wars franchise — now only about 43 years old — is full of secret cameos, soon-to-be-famous actors in tiny bit parts, and familiar faces behind alien masks and makeup. Here are 34 big names hidden throughout the franchise you might not have known about, up to and including Star Wars: The Rise of Skywalker.
Lucasfilm John Ratzemberger (The Empire Strikes Back) Ratzemberger is best remembered as know-it-all postman Cliff Clavin of Cheers, or perhaps his numerous voice roles in Pixar movies. In The Empire Strikes Back, Ratzemberger is one of the Rebel officers hanging around Echo Base on Hoth with Princess Leia and C-3PO (Anthony Daniels). Lucasfilm Treat Williams (The Empire Strikes Back) When you treat Williams, you can err on the set of The Empire Strikes Back and find yourself in the movie. Williams reportedly dropped by England's Elstree Studios set, where the movie was filmed, to visit Carrie Fisher. Apparently, one thing led to another, and now Williams is playing one of the Rebel troopers running around Echo Base on Hoth. Lucasfilm Julian Glover (The Empire Strikes Back) Julian Glover's General Feathers is arguably the most accomplished officer available to Darth Vader as wandering the galaxy in search of the Rebels and Luke Skywalker. He'll certainly be less competent than Grand Maester Pycelle on Game of Thrones, but certainly has more evil like Nazi collaborator Walter Donovan in Indiana Jones and the Last Crusade (you know -- the guy who ages super quickly after drinking from the wrong grail). Lucasfilm Tony Cox (Return of the Jedi) In an Ewok suit, you never knew Tony Cox appeared in Return of the Jedi. He didn't really want to show his acting chops until later when he steals scenes all over comedies like Bad Santa, where he was Billy Bob Thornton's much smarter mall-robbing accomplice/Christmas elf, and I, Myself and Irene. Lucasfilm Deep Roy (Return of the Jedi) It's easiest to remember Deep Roy in the Johnny Depp starring Charlie and the Chocolate Factory, as Roy played every orange compa loompa in that movie. In Return of the Jedi, he was both an Ewok and the puffy alien band member Droopy McCool in Jabba's Palace. Deep Roy also worked on The Empire Strikes Back, acting as a stand-in for the muppet Yoda. Lucasfilm Keira Knightley (The Phantom Menace) Knightley wasn't just any handmade in The Phantom Menace — she was the handmade. Knightley was the actress who thought Amidala was for half the movie, before Natalie Portman's Padmé revealed her true identity. Lucasfilm Peter Serafinowicz (The Phantom Menace) Marvel Cinematic Universe fans will recognize Peter Serafinowicz for his turn as untrusted Nova Corps officer Garthan Saal in Guardians of the Galaxy. He did not appear in The Phantom Menace but has the serious, terrifying voice of Darth Maul (the rest of whom were played by Ray Park), as well as for a gun warrior and droid. Lucasfilm Dominic West (The Phantom Menace) The prequel trilogy was filled with actors who would go on to do big things, but who mostly filled small or background roles in the Star Wars universe. Dominic West's character in The Phantom Menace was an otherwise nondescript member of Queen Amidala's palace guard - nothing as interesting as his later turn as Jimmy McNulty on HBO's The Wire. Lucasfilm Sofia Coppola (The Phantom Menace) There was really a mess of these denare. Before she was a full-time director, Sofia Coppola picked up a few small acting gigs, including the handmade Saché in The Phantom Menace. Just a few years after the 1999 movie, in 2003, Coppola would pick up a best director-academy award nomination for Lost in Translation. Lucasfilm Sally Hawkins (The Phantom Menace) Before she was an Academy Award-nominationd actress for her role in Blue Jasmine, Sally Hawkins was an extra in the giant celebration scene in The Phantom Menace. She admitted in an interview with Conan O'Brien that she had never actually seen the movie, despite being in it. Team Coco/Lucasfilm Richard Armitage (The Phantom Menace) Blink and you'll miss Richard Armitage's small backstage role (second from right in the background) among the guards on Naboo. Though, it's hard to recognize him without the glamorous locks Armitage sports in The Hobbit as Thorin Oakenshield, or the creepy tee of his turn as killer Francis Dolarhyde in Hannibal Season 3 on NBC. Lucasfilm Rose Byrne (Attack of the Clones) Before she was a mainstay of the Treacherous movies with Patrick Wilson or joined the X-Men franchise as CIA agent Moira MacTaggart, Rose Byrne was one of the handmaids serving Queen Amidala (Natalie Portman) in the Star Wars prequels. Specifically, she was Dormé, who accompanied Padmé to Coruscant to do government things. Lucasfilm Martin Csokas (Attack of the Clones) The Star Wars movies have slipped some famous actors into the voice rolls of strangers. Martin Csokas is one - he has the voice of the Geonosian alien Poggle the Lesser in Attack of the Clones. Fantasy fans probably know him better than the eleven Celeborn, man after Cate Blanchett's Galadriel in The Lord of the Rings. For more features and deep dives into the world of Star Wars and the culture around it, be sure to check out IMDb's Star Wars pivot. Lucasfilm Joel Edgerton (Attack of the Clones, Revenge of the Sith) Luke's moisture-farming, humorless Uncle Owen Lars was young once, but he was never a man standing around a crappy hometick on Tatooine. In the prequel movies, the role was picked up by Joel Edgerton of Loving and The Great Gatsby. Lucasfilm Bai Ling (Revenge of the Sith) Bai Ling actually doesn't appear in Revenge of the Sith, but she was supposed to. Her scene as Senator Bana Breemu was cut from the film. But there are things you have definitely got her insulteud Crank: High High The Raven and Entourage. Lucasfilm Keisha Castle-Hughes (Revenge of the Sith) Somewhere After Padmé's term as Queen ended by Revenge of the Sith, the wise people of Naboo apparently prefer another teenage queen: Queen Apailana, played by Keisha Castle-Hughes. Apailana is seen at Padmé's funeral, and Castle-Hughes is known for The Whale Rider and appeared on The Walking Dead. Lucasfilm Simon Pegg (The Force Awakens) Another secret cameo, Pegg is covered in alien costume work as the junk dealer Unkar Plutt on Jakku. He's the man who gives Rei less than her rescue is probably worth. Lucasfilm Bill Hader and Ben Schwartz (The Force Awakens) You'd think the last thing a droid like BB-8 would require is a voice, given that he's a robot and talking in bleep and bloops. But to get the sound and personality just right, director J.J. Abrams enlisted comedian Bill Hader (formerly of SNL) and Ben Schwartz (best known for playing Jean-Ralphio on Parks and Rec). Lucasfilm Thomas Brodie-Sangster (The Force Awakens) Game of Thrones might have noticed a renowned First Order officer during shots of the bridge from the Starkiller Base. It was Jojen Reed, Bran Stark's loyal friend, who also plays Newt in the Maze Runner franchise. Lucasfilm Daniel Craig (The Force Awakens) It was something of a news item at the time, but James Bond slipped into a secret cameo in the first Star Wars film in a decade — as a stormtrooper. He's the guard that Rei manages to trick Jedi mind into releasing her. Lucasfilm Billie Lourd (The Force Awakens) Billie Lourd has sneaked into Lucasfilm's revival of Star Wars as Lt. Connix, one of the Resistance fighters running tactical machinery into the base of General Leia Organa (Carrie Fisher). Known for her hilarious turn as Chanel No. 3 on the horror comedy series Scream Queens, she's also Fisher's daughter. Lucasfilm Harriet Walter (The Force Awakens) Plays a resistance medication that helps out Chewbacca, Downton Abbey alumna Harriet Walter gets a short but sweet cameo in The Force Awakens. She actually has one of the movie's funnier moments as she talks to Chewie about how terrifying his ordeal should have been. Lucasfilm Rian Johnson (Rogue One) The director of 2017's The Last Jedi actually made a cameo in 2016's Rogue One alongside producer Ram Bergman as members of the gun crew of the Death Star. Lucasfilm Justin Theroux (The Last Jedi) Casting The Leftovers star Justin Theroux as the unnamed super-big cutter Finn and Rose are looking for is a fun cameo that winds up being a delusional and a fun joke. Instead the pair find Benicio del Toro's DJ to take over the job. Lucasfilm Joseph Gordon-Levitt (The Last Jedi) Director Rian Johnson and Joseph Gordon-Levitt collaborated on the 2005 movie Brick, the director's first feature-length movie. JGL makes the most of their friendship through a stranger in the Star universe called Sloven Lo, a riff on the Beastie Boys song Slow & amp; amp; he's the guy who's really upset about Finn and Rose's bad parking job. Tom Hardy (The Last Jedi) Takes a page from Daniel Craig's cameo in The Force Awakens, Tom Hardy grabs a stormtrooper uniform to appear in The Last Jedi. His scene (which also features Princes William and Harry) was sadly deleted, but it finds itself in an elevator with an incognito Finn. Rose and DJ as they sneak around midway through the movie. Hardy's trooper admits Finn and congratulates him on promoting what his uniform suggests, even giving him a supportive smack on the buttocks. Ralph Ineson (The Last Jedi) Another familiar face featured in the deleted sequence aboard the First Order ship is Ralph Ineson, star of The Witch. He plays an officer who immediately recognizes that Finn and Rose don't belong. He later appears with a detaching stormtroopers to catch the impostors for real. Lucasfilm Gareth Edwards (The Last Jedi) Edwards gave Rian Johnson a cameo in Rogue One, so the director repaid the favour by making Edwards one of the Resistance troops standing their ground on Crait. He is the man who incredulously looks at the trooper who decided to taste the ground. Lucasfilm Clint Howard (Solo) Director Ron Howard's brother Clint is a well-known actor whose career goes all the back to the original Star Trek series. He appeared in a cameo role, as seen in this photo from his Twitter account, as a particularly average man in Solo who managed a droid fighting pit - and gets a rough talk with Lando's droid companion L3. Twitter Jon Favreau (Solo) The Iron Man director (who also plays Happy Hogan in the Marvel Cinematic Universe) and star of Swingers doesn't fully appear in Solo, but his voice does - he plays Rio Durant, the much-armed member of Tobias Beckett's crew. Favreau gets the joke member from the heist crew in the movie and acts as a pilot, despite Han complaining that he wants the job. Lucasfilm Jodie Comer (The Rise of Skywalker) Comer, of Killing Eve fame, made a very surprising appearance in flashbacks as Rey's mother. John Williams (The Rise of Skywalker) Williams provided the score for every main series Star Wars film, but he's never done a cameo in any of them until he popped up in the bar on Kijimi where our heroes meet Babu Frik. Lin-Manuel Miranda (The Rise of Skywalker) The Hamilton and In the Heights creator has a song for The Force Awakens, but this time around he has to actually appear on screen for a very brief moment during the Resistance's celebration at the end of the film The Star Wars franchise - now only some 43 years old - is full of secret cameos - is full of secret cameos - now only some 43 years old - is full of secret cameos, soon-to-be-famous actors in tiny bit parts, and familiar faces behind alien masks and makeup.
